

Shay Murtagh – have provided concrete solutions for roads, rail, industry and most notably the water sector for over 35 years. The company is seen as the leading supplier of precast, pre-stressed and postensioned concrete storage tanks. Manufacturers and suppliers of precast concrete bridge beams, culverts, retaining walls and a range of other concrete products all of which are included in the company's' extensive product portfolio.

Water Sector

Shay Murtagh are renowned in the market place for Concrete Storage tanks. This pre-stressed and post-tensioned concrete storage tank system which is manufactured, supplied and erected by the Company is extensively used in the Water and Waste Water Industry. The Company has undertaken over a thousand Municipal and Industrial projects with Local Authorities, Large Industry and Civil/Building Contractors.

The Storage Tank system can be used for a wide range of applications including, Water Storage Reservoirs, Aeration Tanks, Clarifier/Settlement tanks, SBR Tanks, Anoxic Tanks, Picket Fence Thickener Tanks, Slurry Storage Tanks and can be obtained in capacities ranging from 35 cubic metres (7,700 gallons) to 15,000 cubic metres (3.30 million gallons). From design Shay Murtagh can assist and provide services to planning and development. With an experienced team of in-house and external consulting engineers, project specific calculations and drawings are created to fulfill all Client and Project requirements.

After order is confirmed production drawings are created and authorised. Within our controlled modern manufacturing facility we produce all products under a strict integrated management system which incorporates Quality, Environment and Health and Safety. This ensures a high quality product finish.

As part of our storage tank capabilities we have highly trained, skilled and experienced installation crews. These teams are professional of task and meet all project requirements and can provide on-site problem solving solutions for each specific contract.

With all these components Shay Murtagh can deliver a high quality product within a competitive cost structure. Precast is a cost effective solution to in-situ contracts, it provides speedier contract completion through faster erection time and no time-loss from on site shuttering. Our proven reputation of product quality and contract performance has given us repeat Customers who value our experience and expertise.

Shay Murtagh create concrete solutions for all projects from bespoke items to industry specific requirements. Shay Murtagh bring "Value Engineering" to the construction marketplace.
